IPPOLITO FLEITZ GROUP

WE ARCHITECT YOUR IDENTITY

Ippolito Fleitz Group is a multi-disciplinary, internationally operating design studio based in Stuttgart.

We are identity architects. We work in unison with our clients to develop architecture, products and communication that are part of a whole and yet distinctive in their own right. This is how we define identity:

- With meticulous analysis before we begin.
- With animated examination in the conceptional phase.
- With a clarity of argument in the act of persuasion.
- With a love of accuracy in the realisation.
- With a serious goal and a lot of fun along the way.
- Working together with our clients.

As architects of identity, we conceive and construct buildings, interiors and landscapes; we develop products and communication measures.

We do not think in disciplines. We think in solutions. Solutions that help you become a purposeful part of a whole and yet distinctive in your own right. We architect your identity.

Currently, Ippolito Fleitz Group presents itself as a creative unit of 37 designers, covering various design disciplines, each contributing specific skills to the alternating, project-oriented team formations.

We maintain branches in Zurich (Switzerland) and Seoul (Korea). Our projects have won over 100 renowned international awards – DDC award, iF award or red dot award – and have been published numerous times worldwide.
