## DER SPIEGEL – Kantine

Inneneinrichtung. Interior design

The employees' canteen was and is a calling card of the SPIEGEL Group, reflecting its journalistic philosophy as much as its culture of dialogue. It is a space that meets all functional demands while creating a strong visual impact to form a truly distinguishing space. In so doing it supports the mature culture of communication within the company and in a grand gesture transmits these values to the outside world.

The ceiling design is the distinguishing moment of the space. It consists of 4,203 pendant circles of aluminium.
